

Aurora Activewear – Paid Media Performance Report

Quarter: Q1 2026 (1 January 2026 – 31 March 2026)

Prepared for: Marketing & Growth Team

Prepared by: Performance Marketing Analyst

Section 1 – Executive Overview

Overall, Q1 2026 delivered solid growth in revenue and traffic, with mixed performance versus our ROAS target of 4.0.

Prospecting campaigns drove strong reach and impressions, while retargeting maintained efficient returns on Instagram and Facebook.

However, LinkedIn and some TikTok tests underperformed our efficiency thresholds, dragging down blended ROAS.

Key Overall Performance Metrics (All Paid Channels Combined – Q1 2026):

- Spend: 125,000.00
- Impressions: 4,500,000
- CTR: 2.1%
- ROAS: 3.4

Notes:

- Overall ROAS of 3.4 is below the brand's target ROAS of 4.0 but above the minimum 3.2 threshold for tests.
- CTR of 2.1% is slightly above the 2.0% target for prospecting but below ideal retargeting levels.

Section 2 – Channel Breakdown

2.1 Instagram (Feed, Reels, Stories – Paid)

- Spend: 55,000.00
- Impressions: 1,800,000
- Clicks: 45,000
- CTR: 2.5%
- Conversions: 3,000
- Revenue: 240,000.00
- ROAS: 4.36

Highlights:

- Best performing primary channel by both ROAS and revenue volume.
- Reels placements outperformed static Feed ads on CTR and ROAS.
- Creative with real-customer testimonials drove the highest engagement and conversion rate.

2.2 Facebook (Feed, Stories – Paid)

- Spend: 30,000.00
- Impressions: 1,200,000
- Clicks: 24,000
- CTR: 2.0%
- Conversions: 1,350
- Revenue: 96,000.00
- ROAS: 3.20

Highlights:

- ROAS is at the minimum acceptable threshold for experimental campaigns.
- Performance is stronger for retargeting audiences than for cold prospecting.
- Video creatives outperformed static image ads on CTR but not always on ROAS.

2.3 Google Search (Brand + Non-Brand)

- Spend: 20,000.00
- Impressions: 650,000
- Clicks: 19,500
- CTR: 3.0%
- Conversions: 1,100
- Revenue: 82,000.00
- ROAS: 4.10

Highlights:

- Brand campaigns delivered ROAS above 5.0, offsetting weaker non-brand terms.
- Non-brand “gym leggings” and “workwear athleisure” keywords delivered decent volume but lower ROAS.

2.4 TikTok (Test Budget)

- Spend: 10,000.00
- Impressions: 550,000
- Clicks: 9,900
- CTR: 1.8%
- Conversions: 320
- Revenue: 19,200.00
- ROAS: 1.92

Highlights:

- Underperforming vs. brand ROAS targets, though CPM is low and reach is high.
- Audience skews younger than our core (18–24), with lower conversion rate.

2.5 LinkedIn (Limited Test – Sponsored Posts)

- Spend: 10,000.00
- Impressions: 300,000
- Clicks: 4,200
- CTR: 1.4%
- Conversions: 160
- Revenue: 9,600.00
- ROAS: 0.96

Highlights:

- Significantly below Aurora’s minimum acceptable ROAS.
- Audience quality is reasonable for brand awareness but poor for direct-response sales.
- Does not align with our stated priority on Instagram over LinkedIn for performance marketing.

Section 3 – Audience & Creative Insights

Top Performing Audiences:

- Returning customers / past purchasers (Instagram & Facebook):
 - ROAS > 5.0
 - CTR ~3.2%
- Lookalike audiences based on high-LTV customers (Instagram only):

- ROAS ~4.5
- Strong performance in urban metros (Kuala Lumpur, Singapore, Bangkok).

Underperforming Audiences:

- Broad interests (fitness + lifestyle) on TikTok:
 - ROAS < 2.0
 - High impressions but low conversion rate.
- LinkedIn professional interest segments:
 - ROAS < 1.0
 - Users appear engaged with content but rarely click through to purchase.

Creative Learnings:

- Best performing creatives:
 - Short Reels (6–10 seconds) showing office-to-gym transitions.
 - Static images featuring diverse body types with bold, benefit-led headlines.
- Underperforming creatives:
 - Generic stock imagery.
 - Text-heavy image ads.

Section 4 – Summary of Performance vs. Brand Goals

Against Aurora Activewear’s brand guidelines:

- ROAS:
 - Overall ROAS at 3.4 is below the target 4.0 but above the minimum 3.2 test threshold.

- Instagram and Google Search exceed or are close to target; TikTok and LinkedIn are significantly below target.

- CTR:

- Overall CTR of 2.1% slightly exceeds the 2.0% target for prospecting campaigns.

- Retargeting on Instagram and Facebook meets or exceeds the 2.5% CTR aspiration; LinkedIn lags behind.

- Channel Priorities:

- Instagram is the strongest performance channel and aligns with our stated priority over LinkedIn.

- LinkedIn's ROAS of 0.96 and CTR of 1.4% do not justify continued investment at current budget levels.

Key Red Flags (for next-quarter planning):

- Sustained underperformance on LinkedIn and TikTok relative to the 4.0 ROAS target.

- Facebook prospecting ROAS sitting only at the minimum acceptable threshold (3.2).

Key Opportunities:

- Scale winning Instagram and Google Search campaigns where ROAS is at or above target.

- Expand high-performing retargeting and LTV-based lookalike audiences.

- Reallocate a portion of TikTok and LinkedIn budget into Instagram Reels and Google brand search.

End of Aurora Activewear Q1 2026 Paid Media Performance Report.
